

ANKER Euro Cash Cassette ECC

Ready for any currency

Our ANKER Euro Cash Cassette ECC is based on the same concept as the SCC. The difference is its size and the split of the coin and note compartments. This cash cassette is the plastic cassette with the largest capacity in our portfolio. Due to its configuration, it provides space available for all currencies and can hold a large volume of change.

The ECC is also flexible in terms of the closing variant. As it is electronically controlled and opened by the cash register system, it can be completely used without a lock, if required. The ECC can be used with a quality lock, various, specific locking mechanisms or without a lock. For straightforward manual opening of the cassette, products are available for you, such as our manual opening trigger. An optional security key lock offers you additional security.

The cassette recently proved its unsurpassed quality once again, while achieving over **4.2 million openings without problems** in a test conducted by an independent institute.

Technical data

Width	Height	Depth	Weight	Interface
482 mm	100 mm	175 mm	1,9 kg	compatible with all systems

- > Up to nine coin compartments
- > Larger volume for higher cash holdings
- > Individually insertable coin compartments
- > Voucher slot
- > Usable without a lock

Cassette with 9 coin compartments

Locked cassette

Fitted cassette

Customised configuration with coin compartments

Base

All currencies intelligently stored

Up to nine coin compartments, six note compartments and a voucher compartment are available. The **voucher slot on the front** of the ECC allows you to securely insert and store vouchers, without opening the cash cassette. The note compartment can additionally be protected from unauthorised access with a cover.

The ANKER principle: Separate base plate and cash cassette

The ECC system comprises of a based plate and cash cassette. The base is securely mounted on the cash counter as an electronical trigger unit. The cash cassette can be taken out completely. This guarantees secure transport of your cash holdings in a fully-functional cash cassette, completely without additional lids and locks. The simple system for the removal of the cassette also enables a extremely quick and secure change of the cashier: log-off, unlock and go.

Compatible with all well-established cash register systems

All conventional cash register systems are compatible with the ECC. For a system change, you only need to replace the cable or the base. The cassette can be used unchanged.
