

Cash drawers

## MDS 54

### The individual for small depths

Due to its low installation depth the MDS 54 is perfectly suited for installation on and under the counter. The drawer is particularly suitable where space is limited behind the counter.

The wide cash drawer offers space for a generous cash insert with big coin cups to hold even larger amounts of change. The removable cash insert can be configured individually, e.g. to keep banknotes further away from passing customers.

The coin insert with 8 separate coin cups can be removed en bloc. Upright note compartments with pressure plates allow many notes to be stored in each compartment. An universal compartment for receipts and rolls of coins is located below the coin section.

The robust all-steel construction as well as the galvanised, ball bearing mounted telescopic runners provide stability and, in addition to the proven locking mechanism, help ensure the security of the money.

#### MDS 54 at a glance

- > 8 weighable coin cups
- > 4 angled note compartments
- > Receipt compartment under coin insert
- > Two slots for receipts or coupons

Two slots to separate documents

Closed drawer

Drawer containing money

Drawer without money
